- Strategic thinking
- Teamwork and Collaboration

ABOUT ME

As an aspiring and committed BSIT student who believes in leadership driven by service, innovation, and results. Through my experiences within the organization, I have gained a thorough knowledge of the organizational strengths and weaknesses, thus encouraging me to take up a leadership role not out of self-interest but for the purpose of driving positive changes for the CCS student body. My plan is to voice and promote the ideas of my peers, create unity among us, and manage activities that will help strengthen the organization and benefit CCS students.

PLATFORMS

As President, I will lead the organization through a systematic management framework that prioritizes organizational transparency, professional representation, and empowered volunteer supervision. Our administration will focus on optimizing the executive flow-utilizing my authority to create specialized committees and mobilize the council of volunteers-to ensure that student needs are addressed with technical precision and administrative accountability. I aim to represent the CCS brand with high-level professional standards in every official engagement while maintaining strict oversight of all financial and membership operations to ensure a stable, resource-driven environment. By delegating responsibilities effectively and fostering direct communication between the students and the SBO, I will transform the organization into a high-performance system that provides clear vision and support for every IT student.

PROJECTS

To translate this executive framework into tangible results, I have architected a series of targeted projects designed to address the specific technical and professional needs of our student body.

- **Project "Industry Bridge":** Re-engineering external partnerships to create formal career pipelines and industry exposure for CCS students.
- **The CCS Bug Tracker:** Implementing a transparent, status-based system to ensure all student grievances and facility issues are resolved in real-time.

TECHNICAL SKILLS

- Executive and Strategic Leadership
- Financial Acumen and Budgeting
- Information Technology Literacy
- Communications and Public Speaking
- Research Skills

PROJECTS

- **The Productivity Hub (Gear Station):** The Productivity Hub is a centralized lending system that provides students with on-demand access to essential hardware, maintenance tools, and presentation equipment ensuring uninterrupted academic performance.
- **The Mobile Service Pavilion (The Tent):** Implementing a versatile, high-visibility field unit to provide a consistent physical presence for student services, on-ground event management, and real-time grievance assistance anywhere on campus.
- **The SBO Data (The PC):** Implementing a centralized, enterprise-grade workstation to transition organizational records from personal storage to a secured institutional database, ensuring long-term data integrity and seamless officer turnover.
- **The Yearly CCS Tech-Ready Clinic:** A comprehensive, service-oriented initiative providing free hardware maintenance and software optimization specifically tailored for CSS Students.

CREDENTIALS

My candidacy is built upon a proven track record of service and specialized training. These credentials represent the leadership foundation and technical insights I will utilize to lead our college to its peak potential.

Executive Leadership & Advocacy

- **PSITS External-Vice President S.Y. 2025-2026**
  - Directly managed the college's external brand and institutional partnerships, bridging the organization and professional industry stakeholders.
- **Codec Studio Project Manager (2023-2025, Capstone Project)**
  - Orchestrated the development lifecycle of a high-level Capstone Project, managing team workflows and technical milestones to deliver complex software solutions.
- **ACLC College of Tacloban SCTL Vice-President S.Y. 2023-2024**
  - Served as a primary executive officer, overseeing organizational governance and spearheading student-led initiatives to improve campus life.
-

Technical & Professional Development

- **Lead System Developer, Academic Research & Development**
  - Engineered a comprehensive Web-Based Attendance Monitoring System utilizing XAMPP server architecture and mobile hardware integration to automate student tracking and data management.
- **Graduate, Beacon Leadership Training**
  - Completed an intensive 3-day summit focused on strategic campaign management, collaborative governance, and advanced student leadership ethics.
- **Participant, Lead the Change: Leadership Seminar**
  - Engaged in a specialized forum dedicated to fostering innovative student advocacy and proactive organizational transformation within the academic community.
