Jeoff Andrew Demecillo

P.E.A.K. PARTYLIST

Position: Running for CSD
Year level: 2nd Year

Course/Program: BS in Information Technology
Section: BSIT - 2E

SOFT SKILLS

- **Teamwork**
Ability to work effectively with others toward a common goal.
- **Communication**
Skill in clearly sharing ideas and understanding others.
- **Adaptability**
Ability to adjust quickly to new situations or changes.
- **Problem-solving**
Skill in finding solutions to challenges or issues.
- **Time management**
Ability to organize and use time efficiently.

ABOUT ME

I am a BSIT student who believes that leadership is about helping, listening, and growing together. As a fellow student development, I understand the struggles we face—tight deadlines, complex coding tasks, and the need for support and collaboration.

I am running as Chief of Student Development to represent our community, strengthen unity among IT students, and create opportunities where we can learn from each other. My goal is not just to lead, but to serve and build a supportive environment where every student can improve and succeed.

PLATFORMS

As Chief of Student Development, I will focus on three core values: student support and accessibility, unity and collaboration, and skill growth and opportunities. I aim to establish a Dev Help Desk, both online and offline, where students can seek assistance with coding, debugging, and projects, while also providing shared learning resources such as notes, tutorials, and recorded sessions. To further support learning, I will organize peer tutoring sessions for challenging subjects. At the same time, I will foster a strong and inclusive developer community that promotes collaboration over unhealthy competition by launching team-based coding activities and encouraging a culture of “walang iwanan, ” where no student is left behind. Lastly, I will prioritize skill development by conducting coding workshops ranging from basic to advanced topics in web and mobile development, organizing mini hackathons and coding challenges, and inviting experienced students or seniors to share practical, real-world insights.

PROJECTS

The focus of my initiatives is to create a supportive, engaging, and skill-driven environment for IT students by providing platforms where they can collaborate, learn, and grow together as a community.

- **Dev Connect Page (Main Project)**
A dedicated online space where students can ask for help, share ideas and resources, find teammates, and stay updated on events. This will be accessible through platforms like Facebook, Messenger, or Discord to ensure convenience. Its goal is to build a connected and supportive developer community.

- **Mini Challenges & Collaborations**
  Fun and beginner-friendly coding challenges that can be done individually or in groups to encourage
  participation. Activities like simple website creation, UI design, and debugging tasks will help students
  practice their skills. This project promotes teamwork, confidence, and continuous learning.

- **Project Showcase Program**
  A platform where students can present their finished projects such as websites, apps, or systems to
  others. It allows them to gain feedback, recognition, and inspiration from fellow students. This will help
  highlight student talent while encouraging more innovation and collaboration.

- **CollabChain Projects**
  It is a program held only during intramurals where each team is composed of at least 9 members. Instead of the whole team working at once, only 3 members are assigned at a time to develop and improve the website within a 3-hour cycle. Each group of 3 members works for 1 hour before the next set of 3 members takes over.
  This rotation continues throughout the event until all members have contributed. It promotes unity, teamwork, and collaboration, showing how different individuals can build on each other's work through coordination, adaptability, and shared responsibility toward a common goal.

CREDENTIALS

My candidacy is grounded in my experience as a dedicated student leader and active participant in academic and community
initiatives. These experiences have equipped me with the leadership, collaboration, and practical skills I will use to serve our
college and help every student reach their full potential.

- **Participant, Lead the Change: Leadership Seminar**
  Engaged in a specialized forum dedicated to fostering innovative student advocacy and proactive organizational
  transformation within the academic community**.**
- **Supreme Secondary Learner Government.**
  I served as a student leader from 2016 to 2019 as a Grade 7 to Grade 9 representative, where I gained early experience in
  leadership, responsibility, and representing my fellow students.
- **Hands-on experience in networking & system development through projects and academic initiatives.**
  I have gained practical experience by working on school
  projects related to networking and system development.
  These activities helped me understand how systems work
  in real academic environments.
- **Active participant in teamwork, group projects, and idea-sharing.**
  I actively take part in group activities where
  collaboration and idea-sharing are important. This has helped me improve my communication and teamwork skills.
