- Certified in Financial Literacy Fundamentals Seminar (2024)
- Boyscout of the Philippines, Mandaue City Comprehensive National Highschool (2022)

C. PLATFORM(S)

1. CCS Event Requirements Tracker Program

I propose to enhance our College of Computer Studies' existing event requirements documentation system by upgrading it to a fully accessible online platform where all CCS students can conveniently check, anytime and anywhere, the status of their submitted paper requirements, forms, and supporting documents for any department event—each submission is clearly marked as submitted, pending review, approved, or missing, so you can instantly confirm if your requirements meet the event's standards. This improved system keeps all event-related requirement records organized and updated in real time, eliminating confusion, lost paperwork, and the need for repeated follow-ups with organizers or advisers, ensuring full transparency and convenience for every student participating in department activities.

2. CCS STUDENT BANK PROGRAM

I propose to establish the CCS Student Bank Program, a fund management system modeled after a trusted, regulated bank. This program will ensure straightforward processes for depositing contributions, efficient withdrawals for school-related needs, and full transparency and security for all transactions.

1. Deposit Process - All contributions are logged like official bank deposits, with issued receipts and an up-to-date balance accessible anytime

2. Withdrawal System - Fast release of funds for projects, events, or other school needs, simply submit a valid request for quick approval

3. Transaction Records - Every deposit and withdrawal is clearly documented, with no hidden or unlisted transactions

4. Secure Fund Management - All funds are kept secure, with only approved transactions allowed to prevent any misuse

With this project, we build a secure, transparent, and student-focused fund system that turns every contribution into meaningful support for your academic and campus life, ensuring trust and value for every CCS student.
