- Organizational skills
- Time management
- Adaptability and fast learning
- Teamwork and collaboration
- Communication skills (friendly and professional)
- Attention to detail
- Dependability and responsibility
- Problem-solving mindset
- Ability to work independently or in a team

ABOUT ME

I am a dedicated and responsible student who values clear communication and teamwork. As a candidate for Chief of Representatives, I aim to create a system where every student is informed, involved, and connected. I am committed to being organized, approachable, and reliable in serving the CCS community.

PLATFORMS

As your Chief of Representatives, my goal is to build a strong, organized, and well connected communication system within the College of Computer Studies. I believe that effective leadership starts with clear communication and active coordination.

I will ensure that all announcements, updates, and initiatives from PSITS are delivered accurately and on time to every year level. No student should be left uninformed, everyone deserves access to important information that affects their academic and extracurricular life.

I will establish a reliable network of representatives per year level, selecting and guiding individuals who are responsible, responsive, and committed. Through this, communication will be faster, more organized, and more efficient.

I will strengthen coordination between class representatives and the organization, especially during events. Manpower will be well-managed and tasks clearly assigned to avoid confusion and ensure smooth execution.

Most importantly, I will serve as a bridge between the Executive Board and the student body, ensuring that student concerns, suggestions, and feedback are heard and addressed properly.

With leadership, responsibility, and teamwork, I am committed to creating a system where communication is clear, coordination is strong, and every CCS student is involved and informed.

TECHNICAL SKILLS

- Communication & Coordination
- Information Management
- Organization & Planning
- Responsibility & Reliability
- Team Collaboration
- Problem-Solving
- Task Delegation & Support
- Basic computer knowledge
- Web development (HTML, CSS, JavaScript)
- Familiarity with Google Workspace
- Documentation and report preparation
- Presentation tools
- Basic troubleshooting and adaptability in tech-related tasks

PROJECTS

- **ACCESS CCS** – Open Access Communication System Problem. Many students are left uninformed because Messenger group chats have a 250-member limit and announcements often get buried. Solution: Create a multi-platform hub using Discord (organized channels for announcements, year-levels, and inquiries), with announcements also relayed through Messenger and Facebook. Impact/Defense: "This project solves the common problem of missed announcements. With ACCESS CCS, no student is left behind."
- **Mental Health & Wellness Week** Promotes student well-being through stress-relief booths, guest speakers, and "No Pressure Day" activities. Shows care beyond academics and supports holistic student growth.
- **Exam Week Support** Booth Provides water, candies, motivational notes, and study tips during exam week. A simple but impactful way to support students during peak stress periods.
- **Welcome Kit for Freshmen** A guide (PDF or print) with tips, contacts, and a campus map to help new students adjust quickly and feel at home in CCS.

CREDENTIALS

- **Website Project**: I have build a basic educational website using HTML, CSS, and JavaScript, showcasing technical skills and creativity.
- **Group Projects**: Regularly involved in group work and class presentations, strengthening collaboration and accountability.
- **Leadership Skills**: Actively led and coordinated activities.
- **Work Experience**: Currently employed as a service crew for 5 months, trained in 5 different stations proving adaptability, teamwork, and efficiency under pressure.
